

Coordinating Freshwater Sustainability

Freshwater sustainability is a top priority for Islands Trust Council and the Salt Spring Island Local Trust Committee (LTC) for the upcoming 2018/2019 fiscal year. Coordinated watershed management is essential to achieving freshwater sustainability on Salt Spring Island. The LTC has asked Trust Council to approve a \$98,500 property tax requisition for the ongoing coordination of the [Salt Spring Island Watershed Protection Alliance \(SSIWPA\)](#) and to continue the development of an Integrated Watershed Management Program. Please see this [FAQ](#) and [backgrounder on the work of SSIWPA](#). For more information, please visit the [LTC Watershed Management Project page](#), the [SSIWPA website](#) or contact ssiinfo@islandstrust.bc.ca.
